Narrative summary of grant related activities

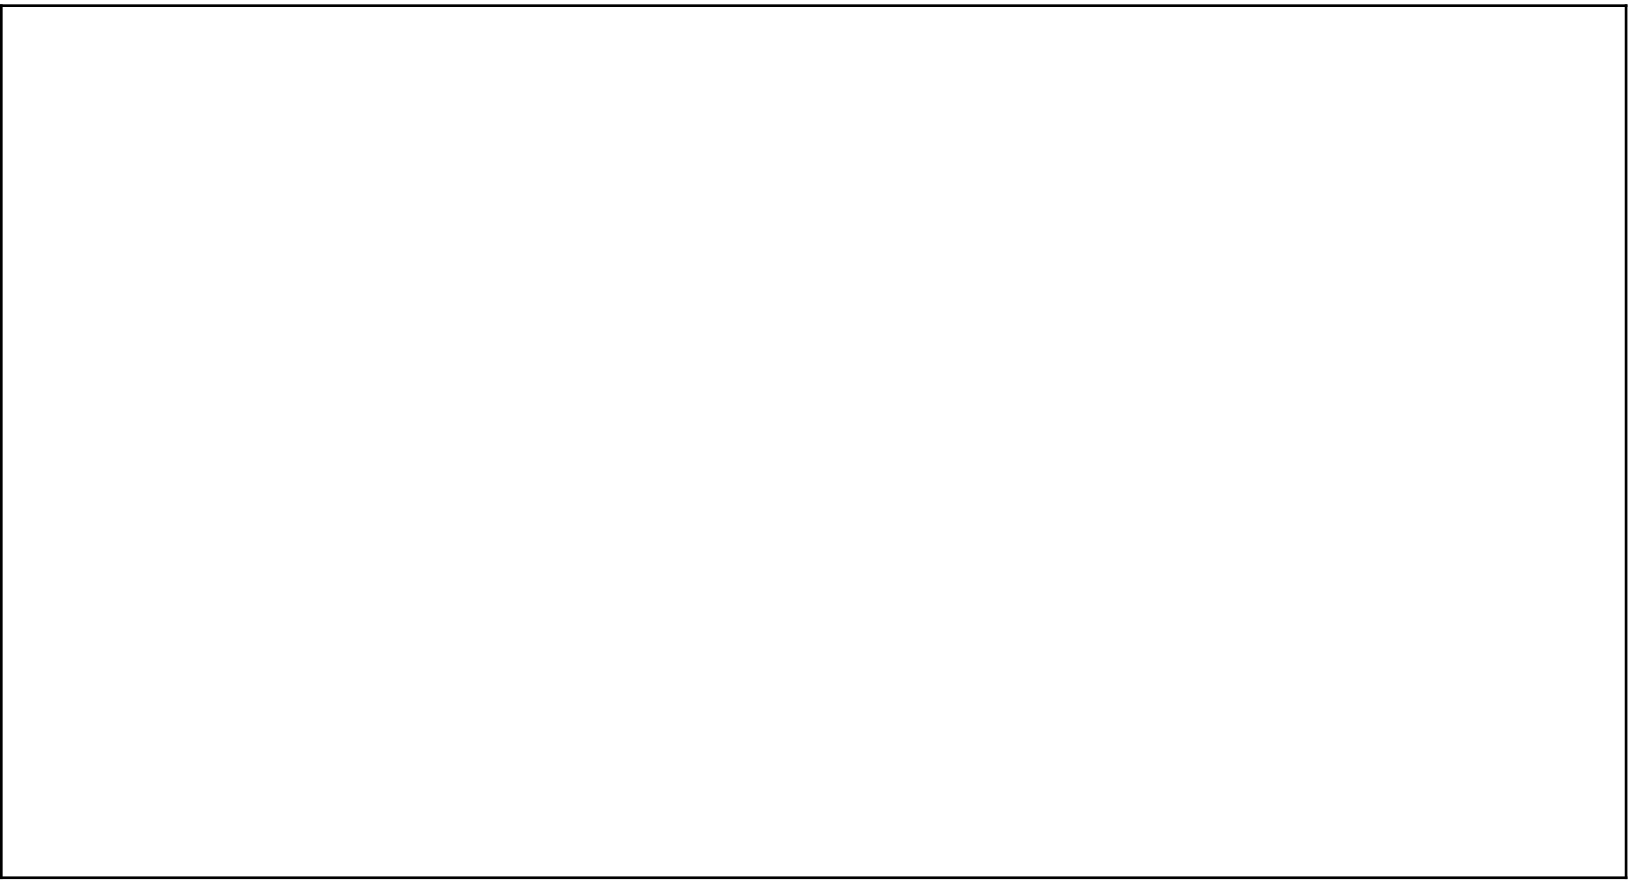

Mid-Year Report

The Tools to Transform Project allowed H&H to purchase a variety of home repair tools. These tools will equip our volunteers with the resources to provide urgent home repairs to low-income families in a more effective and efficient manner.

To accomplish the Tools to Transform Project, a comprehensive list of “most useful home repair tools” was developed by the Director and Project Manager. This list was subjected to a price analysis utilizing a variety of vendors and discounts. After review, the final tool list was determined, and tools were ordered based on quality, availability, and price (see attached list).

After receiving the tools, several were returned due to shipping damage, weight or poor quality. New tools were ordered, bringing the total to \$4995. A photograph of all our tool purchases has been attached.

Next, a Tool Survey was developed, focusing on the practical use of the tools purchased through the Tipping Point grant. When home repair projects and accessibility ramp construction begins in the spring, we will utilize the tool survey with our volunteers, hoping to ascertain the effectiveness of our new tools—and making adjustments as necessary. The survey will also be utilized with our project managers. The Tool Survey has also been attached.

TOOL SURVEY

The following survey is designed to help us gauge the effectiveness of a recent grant we received from Buncombe County. Thank you for your assistance!

Name:

Date:

Number of H&H projects you've been involved in:

Please answer the questions below. Each question is in reference to the tools provided by Hammer & Heart during a home repair or ramp construction project.

What tools did you personally use during the project?

Were the tools you utilized effective for accomplishing the task? If not, why not?

What 5 tools did you find to be indispensable during the project (the project would have been difficult to complete without these tools).

Were there any tools/equipment H&H did not provide that would have been helpful in accomplishing the task?

Thanks for your feedback!
