ECOEXPLORE: FAMILY HERPETOLOGY DAY

May 15 | 3:30-4:30 p.m. | Charles D. Owen Park

**Explore the shores and woods of Charles D. Owen Park
(875 Warren Wilson Road) for a variety of scaly and slimy friends!**

Join Buncombe County's Environmental Educators on May 15 from 3:30-4:30 p.m. at Charles D. Owen Park (875 Warren Wilson Road) for an adventure! Participants will learn how to navigate the web-based platform, ecoEXPLORE while searching the park for amphibians and reptiles. This initiative by the NC Arboretum includes a different challenge each session, which will keep children engaged in learning about nature year-round while also contributing to citizen science. This spring's theme is herpetology, the study of reptiles and amphibians.

In the event of inclement weather, please contact environmental.educators@buncombecounty.org to learn if the program will still take place.
